FRONTAL MATCHED When we use the term 'Frontal Matched' gables, this explains that the sides of your units will be manufactured from the same material as the kitchen door creating a 100% match.

CM

COLOUR MATCHED When we use the term 'Colour Matched' gables, this explains that the sides of your units will NOT be manufactured from the same material as the kitchen door but in a substitute material, usually a melamine faced chipboard to the best available colour match but not the finish of the door. Always consult Richmond for samples to approve.
